

Addon for JoomShopping, allows the administrator to view the sales statistics in the form of a graph. Professionally made the expansion will help to implement control over the sales of your store and efficiency of the advertising companies. Addon `addonSalesCharts`

allows you to view the sales charts for different time intervals, grouping orders on days 1, 3, 5, 7, 10 days, months, quarters and years. Filter plugin fetches the data with respect to the status of orders, all set in JoomShopping currency.

If you hover the mouse on the graph shows the exact amount and date of each bar. Thus, choosing the time intervals, you can get the detailed reporting of trade operations by month, quarter, or year. I hope this development will become an efficient means of trade monitoring and evaluation of the advertising companies of the store.

The expansion of the `addonSalesCharts` developed for Joomla 3+ mode code compatibility with Joomla 2.5. (Joomla 2.5 not tested.) Compact plug-in with stretching schedule under any resolution of the monitor. When developing a plugin, we did not use third-party libraries scripts. The cost of add-on 20 USD. Can be downloaded from our test server
